Project Brief: Personal Portfolio

I am a 21 year old website designer, photographer, foodie and travel enthusiast who will be graduating in May 2017. I need a website to showcase my work, talents, thoughts and pictures that I can present to potential employers. I want the site to use minimalistic design principles to showcase who I am as a creative individual without filling the pages with too much content that it becomes overwhelming. The site should be very easy to use and navigate as well as feature both photos and text.
